I am a front-end engineer in Dallas, TX.

EXPERIENCE

AETNA / SOFTWARE ENGINEER - FRONT-END

Feb 2018 - Current, Remote

Build and maintain reusable + accessible UI components for the UI component library. Build features for the new Aetna web application such as typeahead search that interact with various API's. Provide engineering support to the design team.

KALKOMEY ENTERPRISES / SR FRONT-END DEVELOPER

Oct 2015 - Aug 2017, Dallas + Austin (remote)

Introduced the use of living styleguides along with the SMACSS methodology and BEM naming convention to all new projects for more rapid development and consistency across products.

Built the UI for the internal content/learning management system. Led the front-end development for the customizable storefront that allows state agencies to sell state licensing products.

JOIN'EM / SOFTWARE ENGINEER II - FRONT-END

April 2014 - Aug 2015, Dallas + remote

First front-end engineer hire at start-up company part of a small, close-knit engineering team. Took a concept and built a mobile-first/RESTful API driven single page web application using AngularJS with a living styleguide.

APOLLO INTERACTIVE / FRONT-END DEVELOPER

Aug 2013 - April 2014, Dallas

Built new web pages, responsive email templates, fixed bugs, and added new features for existing client websites.

ONLINE PERFORMANCE MARKETING / WEB DEVELOPER

March 2013 - Aug 2013, Richardson

Built/designed custom, responsive WordPress themes (PHP) for new clients from high-fidelity prototype to fully launched websites.

UT-DALLAS / DESIGNER+DEVELOPER

Nov 2011 - May 2013, Richardson

I maintained the content on the recreational sports dept website. Developed the department site in May 2012. Designed posters, flyers, web slides, and graphics for other print material.
